

# Security Starts Here

With One Identity, you can define a clear path to security and true governance; as well as address the most pressing IAM challenges of your on-premises, cloud or hybrid environment. At the same time, your organization can strengthen security, enhance its agility, empower line-of-business managers to make identity decisions, improve operations, get compliant and be ready for tomorrow.

### **Our technology**

No other single vendor delivers as comprehensive of an IAM product offering. We continually enhance our existing products and portfolio to help your organization be more productive and secure.

### Identity Governance and Administration

Gain simplicity and affordability with a unified foundation that encompasses management, auditing and compliance elements to ensure strong governance.

#### Privileged Access Management

Deliver appropriate access to privileged accounts, bolster security, achieve compliance, streamline administration, and extend governance.

#### AD Account Lifecycle Management

**Identity Services** 

**PAM** 

#### **AD Account Lifecycle Management**

Make the most of your investment in AD and Azure AD by enhancing native account management capabilities to enable you to do your job more efficiently, more accurately, and with less manual intervention. Secure, delegate and streamline common AD account, object and group management tasks, extend AD to non-Windows systems like Unix and Macs and synchronize and automate account lifecycle to your most critical business applications including Cloud and SaaS apps.

**IGA** 

#### **Identity Services**

Extend and enhance your investments in IGA, PAM, and AD Account Lifecycle Management software with SaaS-delivered identity services that enable you to quickly add critical identity functions and accelerate the time-to-value for your identity-centered security program.

## How they work together

#### Modular and integrated.

Our design philosophy is to create great products that work as stand-alone solutions that solve a particular challenge but also fit together in a cohesive system with a single point of management and control for all your identities. So, regardless of your most immediate challenge today, we can help overcome that, as well as support long-term IAM projects that encompass multiple platforms and environments and ultimately get you to a successful digital transformation.

## The path to governance

The ultimate goal is to get to true identity governance. With modular and integrated solutions that support automation, efficient workflows and policies, attestation and reporting, you're assured of security and compliance.

#### **Future-Ready**

- Frequent feature releases
- Fewer costly upgrade (cycles)
- On-prem? Hybrid? Cloud? Yes!

#### **Business Centric**

- Empower the right people
- Focus on business objectives
- Streamline operations
- Lower TCO

## Successful Customer Outcomes

- Award-winning support
- Vast ecosystem of IAM experts
- History of innovation
- Single, strong, stable vendor

## Modular and Integrated

- Start anywhere and build from there
- Cover governance, access and privileged access...
- More benefit, less effort

# **Industry leaders rely on us**

Our solutions play an integral role in the security of world leading industries.
